

Trinity Presbyterian Preschool Pesticide Notification

Trinity Preschool, in compliance with state regulations, will list interested parents and staff on a registry at the beginning of each school year pertaining to pesticide use. This registry will be utilized through the e-mail system to notify parents and staff 24 hours in advance of any pesticide use in the preschool building.

At the present time, the church utilizes Terminix Chemical Company to spray the bathrooms and kitchen in the church facility. The classrooms are sprayed on an as needed basis. If pesticides will be utilized in the preschool building, there will be 24-hour pre-application notification to all persons on this notification registry.

Thank you for your consideration as we continue to provide a safe environment for the children and staff.

Yes, I would like to be placed on the registry.

No, I do not want to be placed on the registry.
