

TRINITY PRESCHOOL CURRICULUM

The curriculum and educational instruction implemented in our program correlates to the Kentucky Early Childhood Standards. This document was designed to reflect the range of developmental abilities typical of young children, birth through 4 years of age. There are Standards and Benchmarks. The Standards represent the content and skills important for early childhood development. The Benchmarks show what a child should understand or be able to do at a specific developmental level.

The lessons taught in the classroom are developed around one or more of the Standards. Listed at the bottom of each monthly calendar are the Standards covered through classroom instruction. The numbers indicate the Benchmarks being addressed within each Standard. Using the Kentucky Early Childhood Standards as a guide, the teachers provide the students with learning experiences that support the overall growth and development of each child. A complete list of the Kentucky Early Childhood Standards is available to download from <http://www.kidsnow.ky.gov>.
